Experience

ICF, Reston, Virginia, US (Remote)

Lead Data Scientist | March 2022 - Present

Senior Data Scientist | May 2020 - March 2022

Data Scientist | October 2019 - May 2020

- Built Azure cloud computing/machine learning infrastructure from the ground up for low-cost, scalable analysis of billions of records of utility smart meter data
- Researched, prototyped, and deployed machine learning models related to utility analytics (e.g., energy disaggregation, energy savings, EV detection)
- Established cross-team Data Science Knowledge Share meetings to promote collaboration and information sharing
- Assisted other teams in scaling data science processes by advising on best practices and providing technical assistance

University of Nebraska-Lincoln, Lincoln, Nebraska, US

Data Scientist | September 2016 - October 2019

- Designed, developed, and deployed open-source, web-based, data analysis application (SQL, R, Shiny) for analyzing repeat-purchase behavior (recruitment, retention, churn, reactivation) of Nebraska sportspeople
- Mentored graduate students and facilitated data science research resulting in multiple journal publications, international conference presentations, and a book chapter

University of Florida, Gainesville, Florida, US

Graduate Research Assistant | August 2012 - July 2016

- Integrated machine learning (e.g., Gaussian process) and optimization to design engineering systems considering uncertainty in future decision making process
- Collaboratively developed optimization-based solution to The NASA Langley Multidisciplinary Uncertainty Quantification Challenge (2014)

ONERA - The French Aerospace Lab, Palaiseau, Île-de-France, France

Ph.D. Student Researcher | October 2014 - March 2016

- As part of international joint-PhD collaboration between 2 universities (UF, EMSE) and ONERA aerospace lab, developed a novel method for optimal design under uncertainty that incorporated risk of future redesign into design optimization
- Co-authored book chapter on advanced space vehicle design under uncertainty

University of Florida, Gainesville, Florida, US

Undergraduate Research Assistant | September 2011 - August 2012

- Created parameterized biomechanical model in Python to understand interactions of patient variability and design changes on safety of Biomet rigid sternal fixation device
- Awarded Biomedical Engineering Society (BMES) Design and Research Award and Knox T. Millsaps Outstanding Undergraduate Paper Award

SpaceX, Cape Canaveral, Florida, US

Launch Engineer Intern | August 2010 - January 2011

- Performed maintenance of launch vehicle ground systems
- Ground crew team member during launch of SpaceX COTS Demo Flight 1

Education

Doctorate | Mechanical Engineering

University of Florida, Gainesville, Florida, US | 2016

École des Mines de Saint-Étienne, Saint-Étienne, Rhône-Alps, France | 2016

Graduate Certificate | Scientific Computing

University of Florida, Gainesville, Florida, US | 2014

Master of Science | Mechanical Engineering

University of Florida, Gainesville, Florida, US | 2014

Bachelor of Science | Mechanical Engineering

University of Florida, Gainesville, Florida, US | 2012

Professional Development

- DeepLearning.AI TensorFlow Developer Professional Certificate (80 hours), Coursera, Credential ID VDW7KD9SA2TM (2023)

Publications

📖 2 book chapters 📄 5 peer-reviewed journal publications 📄 5 conference papers

Data Science Skills

Cloud Computing: Azure • AWS • high-performance computing (Azure Batch) • NoSQL (Azure Table/Blob, AWS S3) • containers (Docker, Azure ACI, Azure ACR)

Communication: presentations • dashboard design (Shiny) • data analysis reports (Rmarkdown, Jupyter) • data visualization (plotly, ggplot2, leaflet) • peer-reviewed publications (journal, book chapter, conference)

Numerical Methods: optimization (stochastic, genetic, multi-start) • differential equations

Programming Languages: R • Python • SQL • Matlab • C++

Software Development: source control (Git, SVN) • agile development (Jira) • CI/CD (Azure DevOps)

Statistics & Machine Learning: deep learning (Tensorflow) • NLP • surrogate models • uncertainty quantification • Monte Carlo simulation • experimental design • survey methodology
